Hi Paul, here are a few pictures from the Santa Monica beach restoration project. They were taken during a monitoring event in September 2017.

- **Dune and Beach Restoration: Santa Monica Bay NEP (SMBNEP)** is promoting and implementing comprehensive sediment management and other "soft" and "living" measures to address the impact of sea level rise in the beach and adjacent ecosystems of the Bay. SMBNEP is working with the City of Santa Monica to restore 3 acres of coastal strand beach habitat, and LAX to restore 48 of 300+ acres of dune habitat- the largest contiguous parcel of dune habitat in Southern California.

Hi Erica,

Do you have a picture from Santa Monica Bay? I'm looking for something to put in our FY18 division operating plan that will go out next week. No big deal if you don't.

Paul
